## SUBMISSION POINTS:

Page no.	Reference (e.g. Policy, rule, method or objective number)	Support/oppose	Decision sought Say what changes to the plan you would like	Give reasons
			I live beside the Ngongotaha river approx 100 metres from the outlet into the lake. Across the river	lake pollution river access, view impeded
			from me are huge willow trees I would estimate at least 5 tons of leaves annually would fall	
			and end up in the lake I don't know what sort of pollution they cause but at the mouth it becomes a slimy mess, that must add to	
			lakes deterioration. I would like someone to visit & see what I mean, before leaves fall.
