Hi David, I can confirm that Genera's view is that the consent align with the EPA decision so on that basis I would suggest that while the consent could be notified before the decision is made the Hearing be held after the EPA decision. I don't think a Hearing for the consent would be likely this year if that was the case.

Best regards

Keith

Thanks for that Keith. It would be good to clarify the recapture issue as there may be implications on the effects assessment etc.

Cheers

Hi David unfortunately the CIA has stretched by a couple of weeks to possibly mid-september. I will have a conversation with Kia Maia and Hayden about notifying earlier without it but the Hearing date may well be better early next year so that the EPA have time to provide us with a decision – especially given your second item.

I will need to catch up with Matt on the implications of the requested change but I think it would be in the best interests of all if this consent could align as much as possible with the EPA determination.

Thanks

Keith

Hi Keith

Thanks for sending the further information for the regional application through last week. I have sent it on to Shane to have a look at and all going to plan I will have a look at it this afternoon.

On the Port consent, any update on the CIA? If we are still aiming for a November/December hearing we will need to get it sorted shortly. On another matter, I see that for the EPA hearings STIMBA amended the application to seek a standard of 30% recapture for log stacks. I note that the resource consent application is proposing that log stack fumigations achieve effective recapture (being the concentration of fumigant (not absorbed by the target product) within the fumigation enclosure at the beginning of the fumigation period is reduced by 80% prior to ventilation of the fumigation enclosure). I just wanted to make sure that this is still the case so that we avoid any process issues down the track if that was to change to 30%.

I'll be in touch regarding the regional application.

Cheers
