Subject: AFFCO Rangiuru Application
Date: Thursday, 7 July 2022 1:40:32 pm

Hi Todd.

Further to our conversation, I can confirm that as part of the current application AFFCO proposes to install supplementary aeration in the Rangiuru oxidation ponds which is expected to reduce wastewater levels of Total N (between 10-30% reduction) and Total Ammonia (greater than 80% reduction). As discussed, AFFCO is currently determining associated specifications and costings.

AFFCO would look to have this additional treatment capacity installed within 2-3 years of granting of the Consent.

If you require any clarification please get back in touch.

Regards

Luke Gowing
