

Bay of Plenty Regional Council
Tauranga General Constituency
Electing 5 Regional Councillors

Larry BALDOCK

My principal place of residence is in the Tauranga General Constituency area.

With major changes ahead with Central Government reforms proposed in 3 waters, Resource Management and Local Government, I believe my experience in Central Government and

City Council over the past 20yrs equips me to serve you in this city and the region.

In public transport one size does not fit all. BOPRC in collaboration with TCC must make our bus service adaptable to the needs of our various communities and deliver major improvements to our road network urgently.

Meeting Government Climate Change obligations to reduce CO2 as required must be balanced with addressing present urgent needs.

A recent NZ study showed that air pollution is contributing every year to thousands of deaths and hospitalisations. The Regional Council must focus more on reducing this health hazard as well as other impacts on our harbour and waterways that come from our urban growth and hosting the largest Port in the country.
