

Bay of Plenty Regional Council Tauranga General Constituency Electing 5 Regional Councillors

Jos NAGELS

Independent

My principal place of residence is in the Tauranga General Constituency area.

Visionary and accountable governance. Resident since 1976. Civil Engineering career encompassing Infrastructure, highways, tunnelling, underpass, rail, city roads. traffic, transportation,

wastewater, stormwater, contracts, consultancy, design and reports. Last 20yrs as Solar Engineer I forged a successful business with Supreme Sustainability Award 2019.

In 2022, BOP must transition from a 1950's urban sprawl, dominant road-car dependent, flawed and unsustainable policies hopelessly outmoded in 21st century. Positively, providing integrated passenger rail simultaneously solves transportation issues, congestion, pollution, emissions, enhances living environments, and housing opportunities, employment access. It also results in greater social equity for all citizens, better lifestyles, improved convenience, and increased community happiness. Practically utilising existing rail corridors, adding city light rail gives extreme efficiency with long term benefits. Holistic issues of plastics, waste, land, air degradation demand serious action. Visionary diplomatic leadership, competent, common sense is timely for greater public good. Our future is a challenging collective responsibility. Vote wisely.
