

Te Waikai Otaota: Te Mahere Nui

Spray plan for Te Arawa Lakes Aquatic Weed Management April 2023

**Koheri ra! Kohera e!
Tutapa mai nuku, tutapa mai whiti
Kia rongō te pō, kia rongō te ao
Kia pā tata mai tō hau manawa
Ki tōku aronga manawa
Hai puta ki te whai ao, ki te ao mārama
Tihē Mauri Ora!
*Toitū te wai,
toitū te whenua,
toitū Te Arawa***

Ngā Tono Whakarite | *Resource consents*

- **68367-AP** (Bay of Plenty Regional Council, Land Information New Zealand)
- **RM16-0520-AP** (Bay of Plenty Regional Council)

Te Waikai Otaota | *Te Arawa Lakes Treatment Areas*

Te Tukunga Waikai Otaota Aquatic weed control operations will be taking place intermittently between the 1st of May to the 31st of July 2023 in Lake Rotorua, Lake Rotoiti, Lake Tarawera, Lake Rotomā, Lake Rerewhakaaitu, Lake Rotoehu, Lake Ōkātina and Lake Ōkāreka using the herbicide Diquat Dibromide.

Anō Pea Te Tukunga Waikai Otaota: Follow up treatment may be applied following this period depending on the results of the initial treatment.

Ka Rāhui Tēnei Takiwā o Te Moana: A rāhui on the area of control prohibiting swimming, taking food, and collecting drinking water will be in place for 24 hours following control operations.

Ka Whakatūria Ngā Pou Whakamōhio: Signage will be erected during this time to ensure all lake users are aware of this rāhui.

Table 1. Treatment areas and proposed dates of control for each lake.

Lake	Treatment area (ha)	Treatment area as a percentage of lake area (%)	Application method	Proposed date range
Ōkāreka	23.9	7.0	Boat	1 May – 6 June
Ōkātina	12.7	1.2	Helicopter	1 June – 31 July
Rotorua	46.7	0.6	Boat	1 May – 6 June
Rotoiti	28.3	0.8	Boat	1 May – 6 June
Rotomā	0.5	0.5	Boat	1 May – 6 June
Tarawera	8.7	0.2	Boat	1 May – 6 June

Rotoehu	13	1.6	Boat	1 May – 6 June
Rerewhakaaitu	3	0.6	Boat	1 May – 6 June

Te Rārangi Whakahaere | *Timing of operations*

The specific timing of operations within each season is dependent on wind, water and weather conditions. Preferred date ranges for each season will be included in each spray plan and provided to the public via methods outlined in the Communications Plan (Appendix 1).

In some cases, follow up control works may be required. Following herbicide application, a 14-day stand-down period will be implemented before further control works can proceed.

Control operations will not occur on any weekend, public holiday or between 20 December and 10 January to ensure the programme does not impede the use and enjoyment of our lakes.

At the request of mana whenua, control operations in Lake Ōkataina will take place in June/July.

Ngā Herenga | Consent conditions

Ngā Tikiwai | *Water takes:*

Consented water takes will be notified via methods outlined in the Communications Plan (Appendix 1) prior to control works. All landowners adjacent to control sites and within a 200-metre buffer zone around each site will be notified prior to control works to ensure those with permitted water takes can take appropriate action.

Ngā Wharau a Ngā Manu Taketake | *Areas of native nesting bird roosting or breeding:*

During pre-spray monitoring a thorough investigation of each site is conducted and any notable areas of bird life recorded. These reports and any others from the community are taken into consideration alongside recommendations from the Department of Conservation to ensure roosting and breeding sites are undisturbed.

Ngā Wāhi Tapu | *Sites of significance to tangata whenua:*

Several sites are considered for control operations each year due to their significance to tangata whenua, such as wāhi tapu, mahinga kai and papakāinga. These sites can be added to or omitted from the programme upon request from hapū.

Ngā Karere | *Notification:*

All practical steps will be taken to ensure that the community, including the Rotorua Lakes Council, the Medical Officer of Health, iwi with mana whenua, landowners and occupiers adjoining or adjacent to areas to be sprayed, and the public are aware of control operations and subsequent rāhui and provided with contact information to discuss any queries or concerns.

Ngā Herenga Otaota | *Current weed conditions:*

Pre-spray monitoring survey is undertaken in the weeks prior to spraying to determine if weed and water conditions are suitable for diquat application. Due to frequent algal blooms the following sites have been omitted from control operations for this period:

- Lake Rotoiti – Okere inlet
- Lake Rotoiti – Te Weta Bay

- Lake Rotoiti – Okawa Bay

Table 2. Total proposed treatment area for each lake and the percentage of the littoral zone this occupies.

Lake name	Treatment area (ha)	Littoral zone (ha)	Treatment area as a percentage of littoral zone (%)
Ōkāreka	23.9	102	23.4
Rerewhakaaitu	3	427	0.7
Rotoehu	13	413	3.1
Tarawera	8.7	543	1.6
Rotomā	0.5	342	0.1
Ōkātina	12.7	304	4.2
Rotoiti	28.3	800	3.5
Rotorua	46.7	2213	2.1

Ngā Pou Ārahi | Cultural Monitoring Plan:

Alongside these control works, a cultural monitoring plan will be implemented to evaluate the impact of operations on taonga species. The purpose of the Cultural Monitoring Plan is to ensure that the values of Te Arawa associated with the lakes are identified and monitored alongside the activity of aquatic weed management.

Ngā tino wāhi | *Priority control sites*

Ōkāreka

Site name	Treatment Area (Hectares)	Application Method	Preferred Date Range
Boyes Beach	6.1	Boat	1 May – 6 June
North Eastern Bush edge	15.1	Boat	1 May – 6 June
Taumaihi Point	2.7	Boat	1 May – 6 June

Rerewhakaaitu

Site name	Treatment Area (Hectares)	Application Method	Preferred Date Range
Homestead Arm	3.0	Boat	1 May – 6 June

Rotoehu

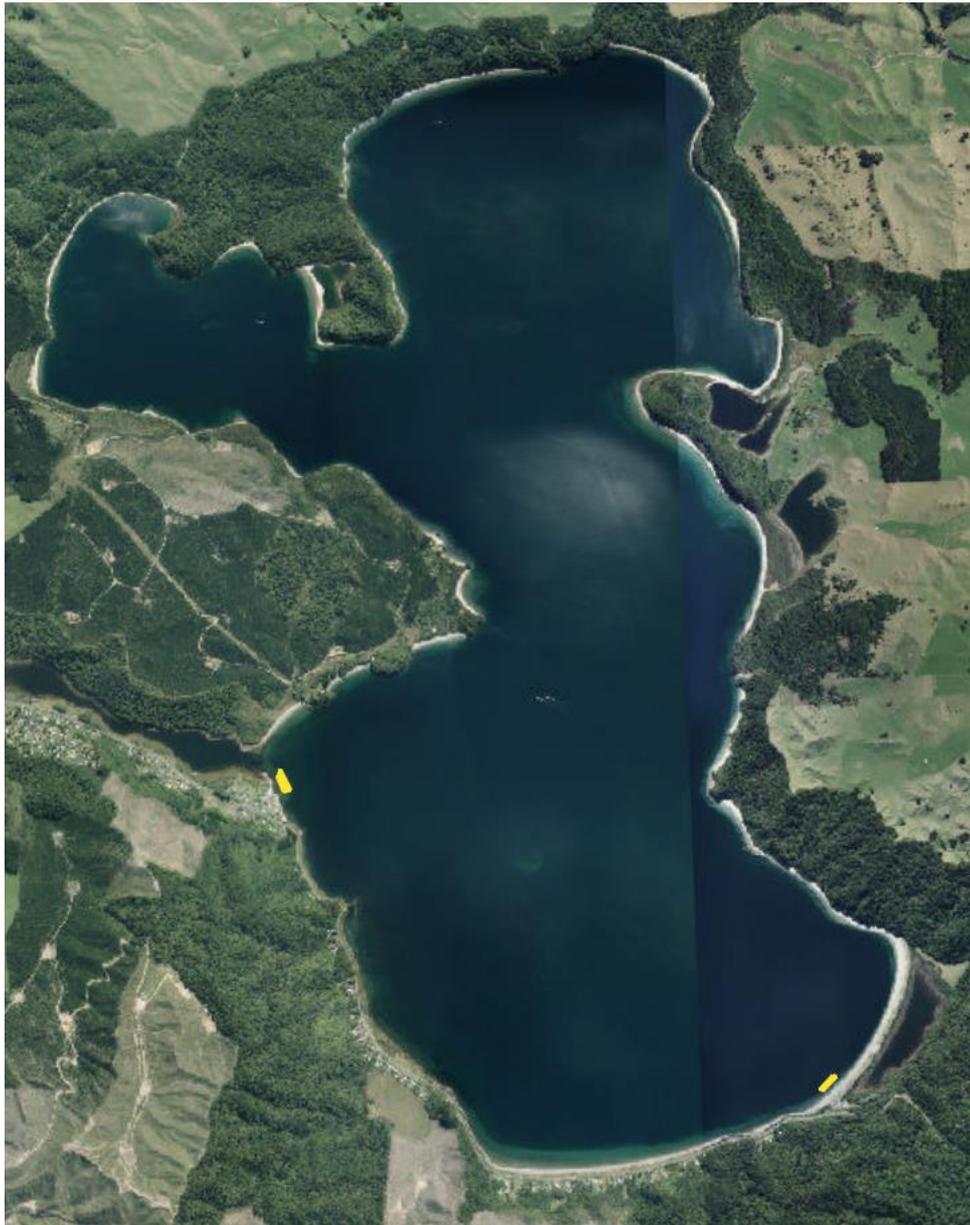

Site name	Treatment Area (Hectares)	Application Method	Preferred Date Range
Waitangi Stream Mouth	9.5	Boat	1 May - 6 June
Kennedy Bay	0.8	Boat	1 May - 6 June
Otautu Bay	2.7	Boat	1 May - 6 June

Tarawera

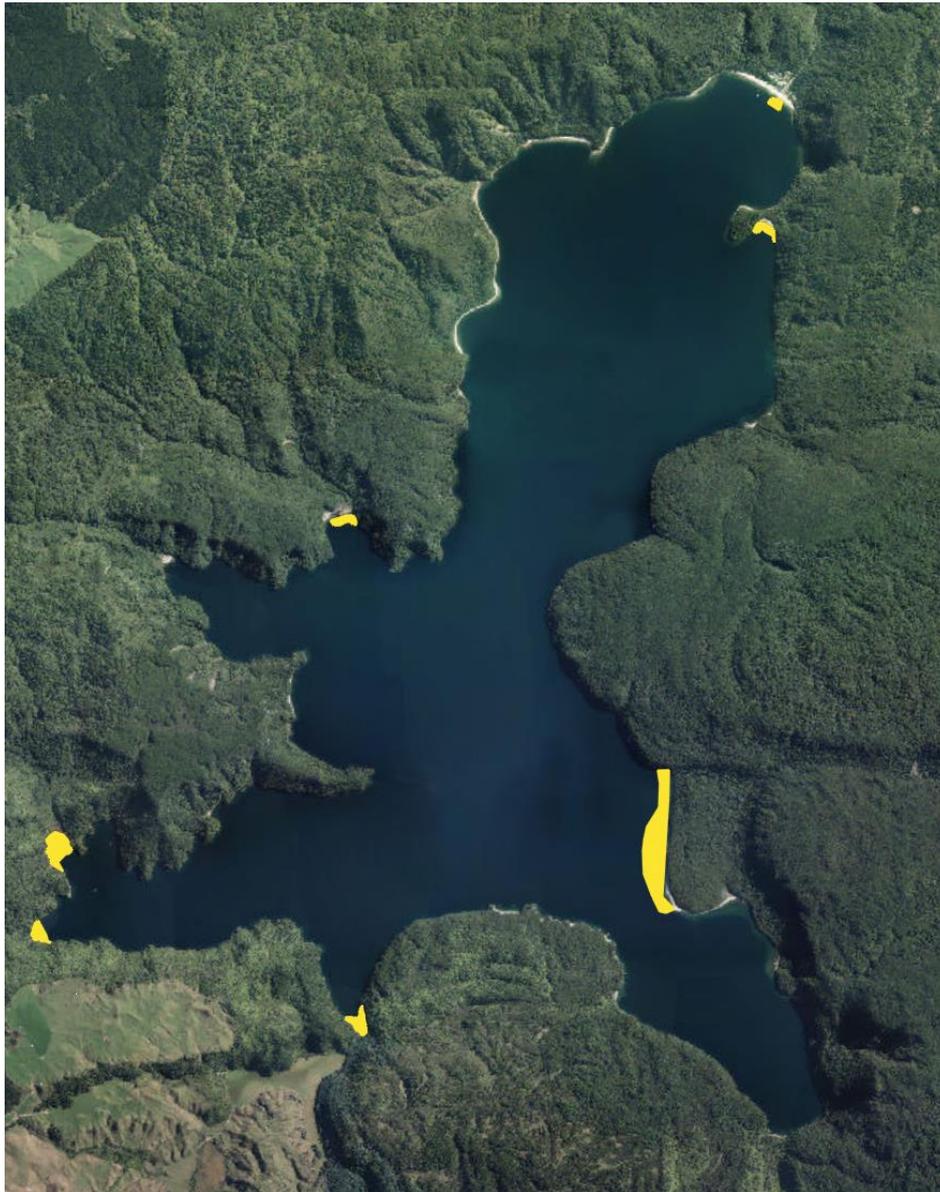

Site name	Treatment Area (Hectares)	Application Method	Preferred Date Range
Boat Shed Bay	0.1	Boat	1 May – 6 June
Te Wairoa Stream Mouth	0.7	Boat	1 May – 6 June
Otumutu Lagoon/Humphries Bay	6.7	Boat	1 May – 6 June
Te Rata Bay/Hot Water Beach	0.1	Boat	1 May – 6 June
Rāpatu Bay	0.5	Boat	1 May – 6 June
Wairua Stream Mouth	0.6	Boat	1 May – 6 June

Rotomā

Site name	Treatment Area (Hectares)	Application Method	Preferred Date Range for spray
Matahi Spit	0.2	Boat	1 May – 6 June
Merge lodge boat ramp	0.3	Boat	1 May – 6 June

Ōkātaina

Site name	Treatment Area (Hectares)	Application Method	Preferred Date Range for spray
Oruaroa bay and Point Beach	7.6	Helicopter	1 June – 31 July
Turanganui/Boat Ramp	0.3	Helicopter	1 June – 31 July
South West Corner	0.7	Helicopter	1 June – 31 July
Haumingi Bay	0.9	Helicopter	1 June – 31 July
Ngahaua Bay	0.6	Helicopter	1 June – 31 July
Southern weed cordon	2.0	Helicopter	1 June – 31 July
Paremata Bay	0.6	Helicopter	1 June – 31 July

Rotoiti

Site name	Treatment Area (Hectares)	Application Method	Preferred Date Range for spray
Gisborne Point	2.1	Boat	1 May – 6 June
Hauparu Bay	1.4	Boat	1 May – 6 June
Okahuturoa/Cherry Bay	3.5	Boat	1 May – 6 June
Te Ti Bay	1.3	Boat	1 May – 6 June
Otaramarae	1.4	Boat	1 May – 6 June
Kakaho Bay	1.0	Boat	1 May – 6 June
Tapuaekura bay	0.3	Boat	1 May – 6 June
Te Waiiti Point	8.8	Boat	1 May – 6 June
Teal Bay	1.0	Boat	1 May – 6 June
Wairau Bay	2.0	Boat	1 May – 6 June
Hinehopu	2.3	Boat	1 May – 6 June
Tau site	0.9	Boat	1 May – 6 June
Ruato Bay	2.3	Boat	1 May – 6 June

Rotorua

Site name	Treatment Area (Hectares)	Application Method	Preferred Date Range for spray
Kawaha Point	46.7	Boat	1 May - 6 June

Te Āpiti 1 | Appendix 1:

Whakapāpā | Communications Plan

Kua tuhia tēnei mahere whakapāpā e ai tā te Tono Rauemi 68367-AP i whakaaetia e Te Moana a Toi, mō te whakarehunga otaota ki te waikai e kī nei ko Diquat Dibromide, ki ngā rotomoana o Te Arawa.

This communications plan is written in accordance with Resource Consent 68367-AP granted by Bay of Plenty Regional Council for the purpose of controlling aquatic weeds with Diquat Dibromide across Te Arawa Lakes.

Aratakinga Whakapāpā | Communication objectives

- Engage with stakeholders and audiences to notify them of aquatic weed control works and use this as an opportunity to empower lake users with information about invasive lakeweeds and aquatic weed management.
- Provide a clear pathway for lake users to enquire about operations. Follow up on enquiries and supply sufficient information to ease any concerns.
- Ensure relevant audiences are informed of aquatic spraying operations including location and timing of proposed spraying and withholding period or rāhui for taking of water, swimming, and taking of fish for consumption.
- Comply with resource consent conditions.

Te Ara Tukutuku | Delivery partners and target audiences

- Target audiences are broken down into four categories:
 - **Mana whenua:** iwi and hapū who hold mana whenua status over spraying areas and/or have wāhi tapu or māhinga kai within spraying areas.
 - **Adjacent landowners:** public and private landowners adjacent to spraying areas.
 - **Business owners:** parties with economic or resource interests in spraying areas, including tourism operators and consent holders.
 - **Community groups:** community associations, schools, recreational lake users and any other parties which have an interest in the spraying area including visitors to the area.
- **Ngā Hoa Tāpui | Delivery partners**
 - Bay of Plenty Regional Council (BOPRC)
 - Toitū Te Whenua Land Information New Zealand (LINZ)
 - Te Arawa Lakes Trust (TALT)
 - Rotorua Lakes Council (RLC)
 - Department of Conservation (DOC)
 - Fish and Game (F&G)
 - National Institute of Water and Atmospheric Research (NIWA)
 - AquaAg Ltd.
 - Medical Officer of Health (enquiries@toiteora.govt.nz). To be informed of proposed spray works and of any poisoning events and/or environmental contamination.

Kupu Matua | Key messages

- Aquatic weed spraying will be occurring in _ area on _ date.
- A 24-hour rāhui or stand down period applies for swimming, taking of water and taking of fish for consumption.

- Invasive lakeweeds are a particular problem in Te Arawa rohe due to their ability to form large dense weed beds that have a negative impact on the lake ecosystem including our native species.
- Spraying invasive lakeweeds with the herbicide Diquat is a safe and effective way of suppressing these invasive lakeweeds based on current research and when used correctly it has no adverse effects on native species or humans.
- Consent has been granted by BOPRC to discharge the herbicide diquat into waterbodies for the purposes of controlling aquatic weeds.
- Any questions or comments concerning these matters can be directed to Te Arawa Lakes Trust via aquaticweed@tearawa.iwi.nz

Te Aronga | Approach

Engagement will occur at three levels:

1. **Notify target audiences** via **letter and/or email** detailing the location and timing of proposed spraying dates and rāhui information about taking of water, swimming, and taking of fish for consumption, and contact details for TALT. All target audiences identified above will be notified at this level.
2. Distribute written and video **media release** about upcoming aquatic weed spraying, the nature of diquat and invasive lakeweeds through local and regional newspapers, radio, stakeholder websites and social media.
3. **Signage** will be erected at each lake detailing the location and timing of control operations, their duration, information about rāhui for taking of water, swimming, and taking of fish for consumption, and contact details for TALT. See Appendix 2 for signage locations. Signage will be removed following this rāhui.
4. **Optional hui** will be offered to hapū affiliated with spraying sites. If accepted, TALT staff to give presentation about current aquatic weed management and accept feedback in person. Feedback from these hui will be recorded and incorporated into future operations. If a hui is deemed unnecessary by the hapū, information will be provided for hapū representatives to distribute.

Te Tūhononga Kōrero | Channels of engagement

Channel	Details of engagement	Timing (approximate)
Written and video media release	Written and video media release distributed via social media and TALT website.	1 week prior to control operations
Email/letter/phone call	Distributed to all target audiences.	1 week prior to control operations and throughout control operations
Websites	Copy of Spray Plan provided on stakeholder websites.	1 week prior to control operations
Newspaper	Notices in Rotorua Daily Post.	1 week prior to control operations
Radio	Announcements made on local radio station Te Arawa FM before and during control operations.	1 week prior to control operations
Social media	Posts made on TALT social media pages. Content will be developed by TALT and once posted a link will be distributed to stakeholders to share.	3 days prior to control operations and ongoing daily updates throughout control operations

Signage	Signage erected at each spray site.	2 days prior to control operations
Hui	Offered as an option to mana whenua.	Ongoing

Whakapā Mai | Contact details

Any queries should be directed to Te Arawa Lakes Trust via email aquaticweed@tearawa.iwi.nz. Further updates in relation to the work and treatment progress can be found on www.tearawa.iwi.nz and www.linz.govt.nz.

Tuku Kōrero Mai | Feedback form

Te Arawa Rotomoana | Te Arawa Lakes Trust Weed Spray Feedback Form

Please fill this form out and return to 1194 Haupapa Street, Rotorua, or email it to aquaticweed@tearawa.iwi.nz if you have any feedback regarding aquatic weed management operations.

This form will be assessed by Te Arawa Lakes Trust Health and Safety Officer.
